University of the People-UOP
(Intermediate english 2 -EAP)

HIGHER EDUCATION 2023-present

University of the People-UOP
(Computer Science)

EXPERIENCE

As a freelance backend developer based in Myanmar, I have been working on various small projects since 2022. Although I have not undertaken significant large projects yet, but have gained valuable experience in applying my backend skills to meet client requirements. I have an experience of using framework like .net , asp.net and laravel. My freelance work has allowed to continuously improve my expertise in backend development.

Prior to my freelance work, I worked as a Sales Manager and Data Collector at a jewelry store from 2017 to 2020. This experience provided with valuable insights into sales strategies, customer management, and data analysis within the retail industry.

In 2017 and 2018, I served as a consultant for ChangeU Myanmar International College, where I contributed my expertise in a consulting role. This experience allowed myself to provide guidance and insights to the college, leveraging knowledge to support their operations.

Additionally, I worked as an admin for a Facebook page focused on marketing efforts. This role involved managing the page, creating engaging content, and implementing marketing strategies to promote products or services.
